WHEN WOMEN THRIVE, BUSINESSES THRIVE

THE WORLD’S MOST COMPREHENSIVE RESEARCH ON WOMEN IN THE WORKPLACE

LINKING ACTIONS TO RESULTS

EXECUTIVE SUMMARY
When Women Thrive is a call to organizations and leaders to think and act differently to advance gender diversity. It is a business imperative with deep and profound social implications — an imperative that every business leader needs to personally drive. Now is the time for us to take action.

Be part of it:

#WhenWomenThrive

www.whenwomenthrive.net
When Women Thrive, Businesses Thrive

In 2014, we released our inaugural When Women Thrive report to amplify the conversation about how to fully engage the global female workforce. Policymakers, academics, CEOs, nonprofits, media, employers, and women themselves recognize that advancing women in the workforce offers one of the biggest opportunities to impact growth, innovation, community, and vitality. But data shows that significant roadblocks remain, despite advances over the past several decades.

Women are still a staggering 118 years away from closing the gender gap — in terms of labor market opportunity, education, health, and political clout — according to the World Economic Forum’s recently released 2015 Global Gender Gap report. 118 years!

We can — and must — do better, and employers and leaders have a critical role to play. The time has come for us to think and act differently.

To break through the inertia and accelerate progress, organizations need actual behavioral change on the individual level — beginning with leaders and progressing peer by peer to create real momentum for change. Organizations need women and men together to recognize that all are better off economically and personally when women make up a larger share of the workforce. And women and men need targeted programmatic changes built on robust proof of what is helping and what is hurting the advancement of women in their own organizations.

When Women Thrive one year later — the most comprehensive look at women in the workplace

Since the release of When Women Thrive, we have had the pleasure of continuing the conversation with thousands of leaders and employers eager to share their progress on the journey toward enhanced gender diversity in their own organizations. With 13 additional countries added in 2015, our research now covers responses from 583 companies across 42 countries, including data on 3.2 million employees, making it the largest study of its kind.

This expanded footprint has enabled us to develop the most robust insights to date about what is required to help women thrive. In this report, we share information about the strategies and tactics that are moving the needle, and about those that are not. We tell you which levers are associated with the largest gains, and provide specific steps you can take to increase the representation of women in your organization. Finally, we share with you a proven roadmap — no matter where you are today — to make that journey to a thriving and gender-diverse workforce.

To purchase the full edition of When Women Thrive, Businesses Thrive, please visit www.whenwomenthrive.net.
Women are just one component of a thriving workforce

Our ultimate goal in sponsoring this work is broader than ensuring that women thrive — it is ensuring a thriving workforce that is diverse and inclusive of all populations. This is what drives innovation and growth in organizations and what drives the advancement of society.

We begin here with women because of the glaring and persistent gap in female workforce participation worldwide and the tremendous danger — and opportunity — this presents to companies and societies. But our approach to analyzing and addressing the drivers of female participation can and should be used to maximize the engagement and productivity of all diverse segments of the workforce.

Thank you to all our participating organizations

We are very grateful to all the organizations that contributed their data and insights to inform When Women Thrive. Our goal now is to further focus the tremendous interest and commitment generated over the past year into an ongoing dialogue among stakeholders that accelerates our progress toward sustained gender diversity in the workforce. Over the course of this multiyear journey, we will continue to track progress across this community and refine our recommendations as needed.

We invite you to join us in seizing this moment. Only by engaging the full talents of both women and men can we expect to keep our organizations and our societies growing.

PATRICIA A. MILLIGAN
Global Leader of When Women Thrive and Multinational Client Group, Mercer

INTERNAL RESOURCE GROUPS AS DRIVERS OF CHANGE AND OF THE BUSINESS

When Women Thrive was established by our internal Women@Mercer business resource group, which was set up more than 10 years ago and consists of more than 50 local chapters across Mercer’s offices and regions. Women@Mercer strategically advises and empowers our efforts to recruit, develop, retain, and advance female talent to the benefit of our clients and our own organizational performance — a people and business imperative.
ABOUT THIS STUDY
RESEARCH THAT IS UNIQUE — AND IS DRIVING REAL OUTCOMES

Building on considerable research that proves the link between diversity, innovation, and profitability, *When Women Thrive* leverages Mercer’s extensive experience with thousands of companies around the world to help understand the actual drivers of success in building gender diversity. Here is a summary.

**Global:** Our study covers 583 organizations in 42 countries, representing 3.2 million employees, including 1.3 million women.

**Holistic:** Our research is more than a snapshot of where organizations stand today, and focuses on linking diversity and inclusion (D&I) programs and policies across health, wealth, and career to tangible outcomes.

**Predictive:** Using the data collected from participating organizations, we are able to forecast how workforces are positioned for change over the next 10 years.

**Ongoing, real-time:** Through our open survey, we will add to our growing database and regularly analyze the latest inputs to provide critical insights, and keep business leaders on the cutting edge.

---

**IN 2015 WE ADDED 13 NEW COUNTRIES**

**647 UNIQUE SURVEY SUBMISSIONS FROM 583 ORGANIZATIONS**

**3.2 MILLION EMPLOYEES REPRESENTED IN THEIR EMPLOYERS’ RESPONSES, INCLUDING 1.3 MILLION WOMEN**

**LINKS HR PROGRAMS FOCUSED ON EMPLOYEE HEALTH, WEALTH, AND CAREER TO SUCCESS IN BUILDING GENDER DIVERSITY**
A note about organizations in the Middle East and Africa
Ensuring that women thrive in the Middle East and Africa is critical to the region’s economic and social development. This report captures limited findings from the Middle East and Africa. We hope to capture additional data from these regions in the future and include the outcomes in our report.

**METHODOLOGY**

Proprietary, predictive, and analytical — identifying solutions that will drive gender diversity.

Mercer’s *When Women Thrive* research looks deeply into what it means for women to thrive — grounding our analysis in the data of today’s workforce, and also in an examination of the programs, policies, and operational context in which employees work.

**FIGURE 5. RESEARCH FRAMEWORK**

<table>

This research used robust analytics to examine what companies are doing to support female talent across a holistic set of policy categories, and correlated these practices with the following outcomes:

• **Current representation of women at the professional through executive levels.**

• **Projected future representation of women at the professional through executive levels over the next 10 years.**

We used a regression-based approach to link survey responses to the specific outcomes described above. The approach controlled for differences across regions and industries, and between organizations of different sizes.

Potential drivers were analyzed — one at a time — to assess their impact on our outcome measures, using a statistical model that accounted for the above controls. This approach ensures that the analysis had sufficient statistical power to identify true effects. Relationships presented are statistically significant at conventional levels.

We also wanted to understand the extent to which organizations are offering key programs — from maternity/paternity leave, caregiving, and sponsored child care to diversity and inclusion resource groups — and actually using them. You will find regional comparisons in our global report on these important programs.
EXECUTIVE SUMMARY 2016

THIS IS A GLOBAL ECONOMIC IMPERATIVE WITH DEEP SOCIAL IMPLICATIONS

Today, there is no region that remains uncommitted to improving gender equality. Indeed, there are profound implications for women, their economies, their companies, even their families.

What we’re doing now is radically changing the trajectory — addressing the deep-rooted inertia that has held organizations and leaders back from real progress on gender diversity.

Studying and talking alone won’t lead to change.

Our research shows that there are strategies waiting for you. With this report, we give you the actions to take today to become the company you want to be tomorrow.

KEY FINDINGS

WOMEN CONTINUE TO BE UNDERREPRESENTED IN THE WORKFORCE AT ALL CAREER LEVELS

- Women make up only 35% of the average company’s workforce at the professional level and above.¹

- Female representation declines as career level rises. Globally, women make up 33% of managers, 26% of senior managers, and only 20% of executives.

- There is an increased focus on hiring and promoting women into executive ranks, seemingly driven by regulation and heightened media attention.

ORGANIZATIONS ARE FAILING TO BUILD FUTURE FEMALE TALENT PIPELINES

- Current female hiring, promotion, and retention are insufficient to create gender equality over the next decade.

- Improvements in hiring at the highest levels of the organization are not extending to lower levels.

- The progress made over our 2014 data does not appear to be the result of systemic improvements in good practices that will support long-term success. Instead, it seems to result from ad hoc actions, such as increased hiring at the top.

A REGIONAL OVERVIEW OF WHERE WOMEN ARE THRIVING — AND WHERE THEY ARE NOT

ARE WOMEN THRIVING IN ASIA?

Asia is projected to have the lowest representation of women in 2025.

- A focus on increasing representation at the top of organizations will not help Asia move out of last place over the next decade in terms of overall female representation.

- Female representation will reach only 28% at the professional level and above by 2025, given current hiring, promotion, and retention rates.

- Organizations here are least likely, compared with other regions, to be focused on many of the drivers of gender diversity uncovered by this research — the engagement of their middle managers (30%) and their male employees (28%), the adoption of a rigorous pay equity process (25%), or the review of performance ratings by gender to look for adverse impact (20%).

ARE WOMEN THRIVING IN EUROPE?

Despite growth in female representation at top levels, European organizations are not on track to make any improvement in female representation at the professional level and above over the next decade.

- Women will make up 37% of those at the professional level and above in 2025 — the same percentage as today.

- However, hire rates for women at the top of an organization are almost double those for men. This might reflect the impact of quotas, regulation, or media pressure. Regardless, the “quick fix” isn’t working, as organizations fail to put into place supporting policies and practices, and as senior women are more likely to exit.

- European participants are much less likely to agree that their women are as well-represented in P&L jobs as they are in functional jobs.

Most regions of the world continue to face challenges in increasing women’s representation at all levels, with Asia projected to have the lowest representation of women in 2025. A bright spot is Latin America, the only region on track to reach gender parity at the professional level and above by 2025.
Latin America is the only region on track to get close to gender parity at the professional level and above by 2025.

- Although women account for 17% of executives today, they are projected to account for 44% of executives in 2025, given current hiring, promotion, and retention rates.

- Women are more likely than men to be promoted from every level — and twice as likely to be promoted from the senior manager level.

- Latin American participants are doing best globally when it comes to middle management engagement in D&I efforts (51%) and equal representation of women in P&L and functional jobs (48%).

- The challenge in Latin America will be to sustain the momentum observed over the past two years.

Although women make up more of the mid- and senior-level workforce in North America than in any other region, current talent flows will yield virtually no gain in women’s representation at the professional level and above over the next decade.

- Although we have seen improvements in promoting and hiring women into the executive level over the past year, women are hired at lower rates at other levels. Again, organizations appear to be focused on a quick fix to improve senior-level representation.

- Less than a quarter of organizations agree that their managers are provided training to actively manage leave and flexibility programs (24%) or report equal representation of women in P&L and functional jobs (22%).

- The region is ahead of other regions when it comes to customizing retirement and savings education/training programs by gender — although this is still very rare, with only 14% of organizations doing so.

Lower hiring and retention rates for women at the executive level, relative to men, mean that women will hold only a third of top jobs by 2025.

- Women currently make up only 17% of executives and 33% of those at the professional level and above — the second-lowest rates after Asia.

- Organizations are much more likely than those in other regions to review performance ratings by gender (38%) and actively manage leave and flexibility programs (57%).

Detailed findings for each region are in the full edition of When Women Thrive, Businesses Thrive, please visit www.whenwomenthrive.net.
**MECER’S 6 P’S OF AN EFFECTIVE GENDER STRATEGY**

This research reveals that breaking through inertia and advancing women in the workplace requires individual and organizational alignment. At Mercer, we call this our 6 P’s of an effective gender diversity strategy.

**WOMEN THRIVE WHEN THERE IS INDIVIDUAL AND ORGANIZATIONAL ALIGNMENT**

**INDIVIDUAL**

**PASSION**

**PERSONAL**

**PERSEVERANCE**

**ORGANIZATIONAL**

**PROOF**

**PROCESS**

**PROGRAMS**

INDIVIDUALS NEED TO:

- Have *passion* to drive diversity
- Make it a *personal* priority
- Show *perseverance* over time

ORGANIZATIONS NEED TO:

- Rely on *proof* before jumping to solutions
- Install regular, robust processes to ensure equity
- Implement and support critical programs
PASSIONATE LEADERSHIP

WOMEN THRIVE WHEN LEADERS AT ALL LEVELS ARE PASSIONATELY ENGAGED

Only 52% of organizations believe their board members are engaged in D&I initiatives, and just 39% agree their middle managers are engaged.

- Organizations with leaders who are actively engaged in D&I have more women at the top, and they hire, promote, and retain women at higher rates relative to men.
- Our experience shows that it is not enough for leaders to mandate change — they must personally drive change through communication and exemplary behavior.

PERSONAL COMMITMENT

WOMEN THRIVE WHEN MEN ARE ENGAGED — AND SEE GENDER DIVERSITY AS A WIN-WIN

Men today are not perceived to be strongly engaged in gender diversity efforts — only 38% of organizations say their male employees are engaged in D&I activities.

- Organizations in which men are actively driving D&I efforts have made more progress on improving gender diversity than those in which men are not engaged.
- Greater gender equity can improve family economics and afford greater opportunities and flexibility to both men and women.
- Incentives for executives to achieve goals are insufficient to drive progress. Executives need to be deeply committed to success.
PERSEVERANCE

WOMEN THRIVE WHEN THE FOCUS IS BROADER THAN ACQUIRING DIVERSE TALENT AT THE TOP

Organizations are not making progress in building their future female talent pipelines.

- Though our data show a recent improvement in hire rates for women relative to men at senior levels, in most regions, men continue to be hired into and promoted from mid-level positions at higher rates than women. And women in senior levels are more likely than men to leave an organization.

- Although focus at the top is necessary given that women today hold only 20% of executive-level positions, the failure to focus further down the pipeline means that women will still represent only 40% of the workforce at the professional level and above by 2025. Organizations need to focus on systemic, supporting practices to build the female talent pipeline that will sustain gender equality in the long term.
PROOF OF WHAT IS HELPING AND WHAT IS HURTING

WOMEN THRIVE WHEN LEAVE AND FLEXIBILITY PROGRAMS ARE ACTIVELY MANAGED

Leave and flexibility programs can either help or hurt gender diversity, depending on who uses them and how well they are managed.

- When both men and women use leave programs, organizations exhibit higher female representation.
- Only 29% of organizations say they give their managers training so they can effectively support employees through the maternity/paternity leave and return-to-work processes — and effectively counter any unconscious bias in rewards and promotion decisions that might be triggered by leave.

WOMEN THRIVE WHEN THEIR UNIQUE COMPETENCIES ARE LEVERAGED IN HIGH BUSINESS-IMPACT ROLES

Our research finds that women have different and unique skills relative to men — skills that are considered critical to career success.

- Traditional job design and valuation leave business growth potential untapped, as leadership competencies are often more closely aligned with the relative strengths of men. Competencies should be updated to reflect what companies need in order to be successful in a changing economy.
WHEN WOMEN THRIVE, BUSINESSES THRIVE

PROCESSES THAT ACTIVELY SUPPORT WOMEN

WOMEN THRIVE WHEN THERE IS A DILIGENT PAY EQUITY PROCESS

Only 35% of organizations report a pay equity analysis process built on a robust statistical approach.

- Organizations with a robust pay equity process and a dedicated team have greater female representation.
- Organizations should build processes that rely on pay data and statistical analysis.
- Formal remediation protocols to address identified pay equity risks should be part of the process.

WOMEN THRIVE WHEN PROMOTION AND PERFORMANCE MANAGEMENT PROCESSES INCLUDE A GENDER LENS

Less than 30% of organizations routinely review performance ratings by gender to check for disparities that translate into differences in opportunities for men and women.

- Progress on gender diversity requires regular focus on equity in performance evaluation and advancement opportunity.
- Organizations that apply a gender lens to promotion and performance management processes have greater female representation.
- Ensuring systemic focus on equity in performance evaluation and advancement opportunities is the responsibility of both HR and business functions.
PROGRAMS THAT SUPPORT WOMEN’S UNIQUE NEEDS

WOMEN THRIVE WHEN THEIR UNIQUE HEALTH NEEDS ARE SUPPORTED

Female representation increases when organizations understand and support women’s unique health needs.

- Women have a unique relationship with health care — as patients, caretakers, and decision-makers — but only 45% of organizations agree that supporting this unique relationship is important in attracting and retaining female talent.
- Only 22% of organizations conduct analyses to identify gender-specific health needs and education.

WOMEN THRIVE WHEN THEIR UNIQUE FINANCIAL NEEDS ARE SUPPORTED

Gender-specific financial wellness practices drive better future representation of women.

- Women face a “perfect storm” financially, because they tend to work in lower-paid employment than men, have more significant gaps in service, and live longer than men, so they need retirement funds to last longer. On top of that, women are more risk-averse investors,2 impacting overall returns.
- Less than 10% of organizations offer retirement programs customized for the behaviors and needs of different genders, or monitor savings and investment choices by gender.

---

WHAT’S NEXT
HOW MERCER CAN HELP YOUR GENDER DIVERSITY STRATEGY

We are here for you. For more information, contact us or visit us at www.whenwomenthrive.net.

DIAGNOSTICS AND STRATEGY

BASE YOUR STRATEGY ON ROBUST WORKFORCE ANALYTICS AND DATA
Mercer has powerful predictive analytics capabilities to support effective strategy development.

ROADMAP

IDENTIFY DISRUPTERS AND SOLUTIONS TO ADDRESS YOUR NEEDS
Mercer’s team of D&I experts can assist your company in building a roadmap focused on your priorities.

EXECUTION

EXECUTE ON YOUR ROADMAP WITH CLARITY AND FOCUS
Mercer has the unique ability and experience to structure our services to meet your organization’s exact needs. We can provide resources to bolster in-house capabilities, or manage the entire project from start to finish.

MEASURE

CREATE A DASHBOARD FOR ALL LEVELS OF THE ORGANIZATION
It is important to keep a pulse on the key measures of success to ensure you are progressing. Mercer has a variety of tools and portals that will assist in measuring and communicating progress.

JOIN US ON THIS JOURNEY

We invite organizations around the world, in all industries and from all sectors, to join the growing community of organizations that have embarked on this journey toward a thriving female workforce. Successfully moving forward will require all of us to think and act differently. But the rewards for fully using this significant workforce are sure to drive great value.
ABOUT WHEN WOMEN THRIVE

Founded in 2014, When Women Thrive is Mercer's global research initiative designed to help companies drive their growth through their female workforces.

Organizations that make women a priority may capture a portion of the reported $12 trillion economic opportunity.

It’s Mercer’s goal to help firms implement successful diversity initiatives — leveraging our unique data and predictive analytics — to realize their corporate growth goals.

ABOUT MERCER

Mercer is a global consulting leader in talent, health, retirement, and investments. Mercer helps clients around the world advance the health, wealth, and performance of their most vital asset — their people.

Mercer’s more than 20,000 employees are based in more than 40 countries, and the firm operates in over 130 countries.

Mercer is a wholly owned subsidiary of Marsh & McLennan Companies (NYSE: MMC), a global professional services firm offering clients advice and solutions in the areas of risk, strategy, and people. With 57,000 employees worldwide and annual revenue exceeding $13 billion, Marsh & McLennan Companies is also the parent company of Marsh, a leader in insurance broking and risk management; Guy Carpenter, a leader in providing risk and reinsurance intermediary services; and Oliver Wyman, a leader in management consulting.

Follow Mercer on Twitter: @Mercer
EDGE is the only global assessment methodology and business certification standard for gender equality.

The EDGE assessment methodology was developed by the EDGE Certified Foundation and launched at the World Economic Forum in 2011. EDGE Certification has been designed to help companies not only create an optimal workplace for women and men but also to benefit from it. EDGE stands for Economic Dividends for Gender Equality and is distinguished by its rigor and focus on business impact. The methodology uses a business rather than a theoretical approach that incorporates benchmarking, metrics, and accountability into the process. It assesses policies, practices, and numbers across five areas of analysis: equal pay for equivalent work, recruitment and promotion, leadership development training and mentoring, flexible working, and company culture. EDGE Certification has received the endorsement of business, government, and academic leaders from around the world.
